Pretoria,  
0001.

Dear Mrs. Theron,

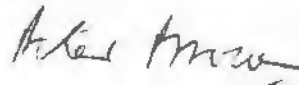

The article we were expecting for the next issue of REALITY did not arrive in time, so that yours has been set by the printers and was destined to appear in it. Now the Emergency has intervened !

I spent yesterday evening with an expert on security legislation who is also on our Board and he came to the conclusion that your article fell within the definition of "subversion". Crazy, isn't it ? His advice was that we would not be able to include it, at least while the Emergency lasted.

I am very sorry to bring you this news and am writing to ask what you would like us to do about the article ? As I said, the article has already been set in type by the printers so we could hold it and use it as soon as the Emergency is over, but you might feel that it would be too dated by then.

Could you let me know what you think ?

Yours sincerely,

P.M.Brown.  
for Reality.
