

AL, York, 24.4.89.

62 - became fully involved.

N.R. asked me to meet people - did.

Rad-ism: less & than L. less concern with theor. & radical analysis. Really imp. mem was one flowing from sense of Frus.

Expressed in people testing system further out Fu in own way.

Ant-U. ap. stuff - within confines of the law. 60, 61, people were beginning to sit - in (USA ex) Addeley St Woolworths. Almost repeat of Def.

Campaign: Law being broken. Pthy frustration. There I saw th was a kind of comp - who more rad than who. That was the mood. P. right on edge th. available for that

Driving force behind: failure. In process of moving on to diff means: people start reflecting a little → where you are and why you're there.

my inv. with CP was peripheral: one clear mem: Mowlby congress. Issue of land had surfaced. I suspect: real worry was match ANC & PAC & blade radicalism which the CP was losing out to. Same in NUSAS: fort time was in. Pressure was to line up on side of blade pol. organisation - comp with C.O.P.

Drafting:

Most people since pol. conscious. Not in favour of A. Mid-class J family with New S. on table.

Very surprised if many people in A.R.M. w/out some experience.

V. Exciting. I remember very important.

Studying under Jack S. (1) Inside S.A. very little good radical analysis of pol.

econ. (2) was still a moral crusade.

Darlings of British C were Keynesians.

No sense of that: no exp. of class formation in Third World: no pol soc. of 3W.

No theor. framework to which people would turn. Even in late 1960? Nyeu (F & when Ap. disappears. cap will flourish.

No recall no writings about Cuba. New Age?

Algeria. Not limited memory of that
Can't remember.

(a) F.A. Radical S. S. at CT -
would have been harsh

One was aware others around similarly

Land Socialism was ok when first

aware of sharp loss of diff. with P.

PP had moved over to diff. position

Wentzel was in lib. camp. Can't remember.

JL had sawed down pylon. Early org. activity.
Had not heard of JLG.

FR. ~~FF~~ JL was ~~not~~ involved. Don't remember.

~~It~~ was a boat (Torquil) Shampton / Clacketon
Don't know that there was a boat.

Boat: struck me as exciting idea

Jesus: no

Exp 1

MK: don't know whether.

attitude to MK. they were much more penetrable
than we were.

what was main reason: ideal diff
in starting.

How cons. diff? P.A.L. almost more
realist. Not open to membership but B. African
ANC. was more infl. by Party.

to Split. Viewed it regretful. Division
some people in P.A.L. & some pe
were more symp. Sec. not comm.

Fig Most

was group at Goughstown: non-ex. (paper)

edlet: Just a Cape Town thing.

o

Grassroots in townships.
May have been more in Juba.

Don't remember what hap to DIY kit-

- (c) Clear: "moments of wilder fantasy" → thought
that we could join up with A.N.C.
Extension of marching - Wake up
white
Not guerilla warfare tho could
lead to it.

Mass pol: sabotage, just rationale -
sabotage was next step. "it was
louder. I don't think anybody with ex of
Eddie ever saw their inv. with this
org. as a way of life. You've got to
commit your life to it. BF, AS → didn't
thud. Gene Nobody did that. Part-ti-
pship, incidental - imp was not
commitment. There = a contradiction
that lies at heart of white rad.
Was not a priority. Wandering out west
pylon.
