

Dear Phool,

A fool and his money are soon parted. I am a fool.

Hi! Just writing to say hello. Hello!

Anyone analysing this letter will inevitably conclude that the writer has an empty head, nothing to write about. Just emptisms. Why say anything when Silly bush can say it. See

Annexure hereto, marked "A". Use same, after reading, as small room stationery.

However, watch the P's and the T's, and again the P's. They are all Sh men. Did you say something about "Not all the President's men!"

Your telephone call was indeed most welcome. Very few females, apart from the spouse, telephone me these days. So anytime you feel like a few home goseuls phone info. On the subject of females, I am told the Russians like girls with fat legs, while the Yanks like girls with thin legs. The French like something in between. Me too.

Love and regards from Sunny South African when a long drawn cloud prevails. When will it move? Gone with the wind.

Bye Morgan.

One interesting aspect of the issue is the revelation by Vice President, Mr Alwyn Schlebusch, that there has not been a formal proposal by any member of the Council to include blacks among its members.

The failure to include blacks in the 1977 proposals as well as in the President's Council were the basis of the main criticism of both schemes.

It led to Mr Pat Poovaligam qualifying his membership of the Council with the proviso that he would pull out within 12 months if there were no moves to include them.

But in spite of all this, Mr Botha has told his party's mouthpiece in the Cape, the Burger, that he is sticking to his course.

What this course is exactly no one knows, except it now seems quite clear that it is within the framework of keeping the various race groups separate at every possible level.

At the same time however, the issue cannot really be pre-judged until the President's Council makes its first solid proposals and the National Party takes a decision on those proposals.

Mr Botha is not the only person whose image as reformer has become tarnished recently.

Dr Piet Koornhof, Minister of Co-operation and Development, has been in the firing line in the past for
