

24.4.82.

Just phoned Janet: she will phone on Mon 26th.
She says your ticket: MSV - BOTSWANA - LONDON (return
via Mepeto) is on its way to you now - you do
not need to do the long route you spell
out here.

London.

Dear Phyl -

love Judy

Janet told me she was going to phone you
over a month ago to tell you definitely
Elaine is very happy to put you up while
you are here. In fact she is looking
forward to it. So please don't worry
about place to stay - it is all OK.

(Elaine is pregnant!)

Sami is in States - he phoned me from
California to say the beach was wonderful but
the people horrible!

Thank you so much for the Murray book - that
was very very sweet of you to send it - it
was the perfect item for me.

Also thanks for getting the ponchos: I will
reimburse you over here for that, OK?

The only other things I would like if at
all you can manage them are

a) my tapes from Agulu - I'll be writing
for them from him

b) a copy of Poulter's book
Family law + litigation in Lesotho

(it is a badluck R12 - R18).

But don't worry about b) - only if you see it.
Very kind of you to do all this -

I've just finished Island in Chains - it had me
in tears at the end, very powerful book.

Elaine + I are looking forward to you're coming over so much - it will be lovely to have you around - my work is going along smoothly at the moment - if slowly.

I will write to Ajika - don't worry. I find it difficult but I will -

The weather here has been good - I hope it doesn't change by the time you come -

lots + lots of love to Staks - There is one request in your letter I don't understand: "Can you get something done about Nisa there"? Janet says treatment all arranged with IDAF, no problem; but details cannot be fixed until you are here subject to doctor's examination.

All love Judyxx
