My dear Renato & Ralf, Pardon my not remembering earlier to thank you for the gifts you so kindly sent with Ekke. I should tell you that in my childhood (4) when I lost my sister - I only recalled the perfume that smothered her box. I have as a result had a terrible aversion to perfume - My daughter Suka however loves the stuff & she immediately made a grab for it - She was 15 on the 29/5 together with Karsten & the bottles even now keep coming. She is delighted. We are in the midst of winter & this morning scrapped off 1" of frost from the car. Gunter while more used to this weather has to keep warm - & he like all of us eats more than usual to do this - in the result we are putting on more weight.

We trust you're enjoying good health & good weather.

Sincerely,

Ryckis Laidoo.
