

like to me. Please you still write to me all what you feel about the revolution, about my life and what is the programme of your life and there is no problem if you write in English because I improve, maybe. So I have many things to talk with you about my job, my future and I think that it will be possible when I come to Lesotho, if I organise better my life. In fact, Sarah knows very well the situation, I pass this year like the transition from "colonialist time" in the church to new life with the same ideal to fight against the injustice and to collaborate for the better world. I hope with other relations more authentic. Sorry but the paper has run out and I need to finish this letter to you. A big hug to all comrades that fight with you like John, Mike, etc., and for you one big kiss. xxj *Domènec*
