

(xii) the unit must have a plan for emergencies, i.e. for when the enemy acts against the unit. The following are some of the measures taken during such emergency:

put into action the unit's emergency plan by dispersing to hideouts or hiding places that have been prepared long before time (e.g. moving from P.E. to JO'burg). Hideouts must be used for short periods then changed. Those arrested and detained, as a rule, must hold out for at least 24 hours to give time for manoeuvre for the untouched comrades of the unit. The remaining members in the unit must not regroup immediately.

During hiding the unit must use new documents, new passes, new names and addresses. Legends i.e. a satisfactory story explaining why you are at any particular place, at that particular time must be prepared beforehand. The legend will be stronger if you have some documents to back you up. During the crisis you must be highly mobile and use fast transport.

If an underground shadow-leadership has been prepared, it must be brought into action to continue the activities of the unit in the area.

When the coast is clear, signals are made to regroup the unit and restore the underground machinery....
