 Print: De Bussy Eilerman Harris, Amsterdam  
 With financial support from ABB, Amsterdams fonds voor de kunst, NDVB

SOMAFCO is a school for young South Africans who have fled their country and faced many hardships. SOMAFCO is also an unusual community where all the students, parents, teachers, ancillary staff and workers live and work together on the same campus. This situation necessitates not only the continuous running of the school and all supporting structures, but also the organisation of all other aspects of daily life. The work in the agricultural and industrial sectors, the catering, sport and cultural activities, and the manifold political activities which play a crucial role in the community. All of us wish to go back to our homes in South Africa. Nonetheless SOMAFCO is a place which we are proud of as an embryo of the future South Africa.

SOMAFCO is a monument to the SOLIDARITY that exists between the oppressed people of South Africa and the international community. As SOMAFCO flourishes and the ANC DEVELOPMENT CENTRE DAKAWA grows, financial support and material assistance from the international community and the peoples of Tanzania continue to form a crucial pillar in the struggle of the ANC for liberation, justice and peace in the South Africa of tomorrow.
